

## Unified communications (UC) WebFax

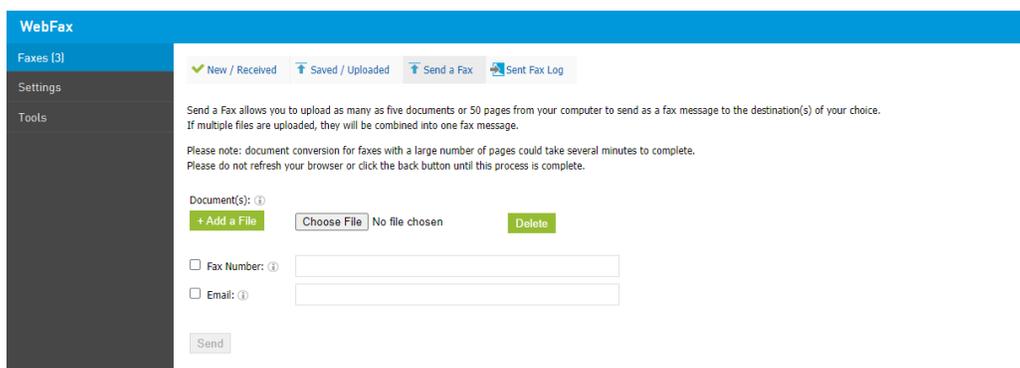

Your virtual, paper-free fax service

WebFax is a "virtual" fax service that allows you to receive and manage your faxes via the online interface. It also gives you the ability to send faxes right from your WebFax resource number. Senders simply dial your WebFax number from their fax machine and transmit their faxes. You are notified of new faxes via email or any wireless device, and you can automatically receive an attached PDF of the fax with your notifications. You may view, print and forward faxes to any email address or fax machine, and, from the online fax interface, you can send any document you choose to one or more fax machines, as well as to your personal mailbox.

### SIMPLE SETUP

WebFax is setup in three simple steps

1. Go to the login page by clicking on the provided email link sent to the account administrator.
2. Enter your WebFax Number and temporary PIN. Change your pin when prompted. (It is important to change your PIN from the temporary PIN provided.)
3. After changing your PIN, you're all set and can begin to send a fax!

[Saved / Uploaded](#)
[Send a Fax](#)
[Sent Fax Log](#)

Send a Fax allows you to upload as many as five documents or 50 pages from your computer to send as a fax message to the destination(s) of your choice. If multiple files are uploaded, they will be combined into one fax message.

Please note: document conversion for faxes with a large number of pages could take several minutes to complete. Please do not refresh your browser or click the back button until this process is complete.

# EASY ACCESS TO YOUR FAXES

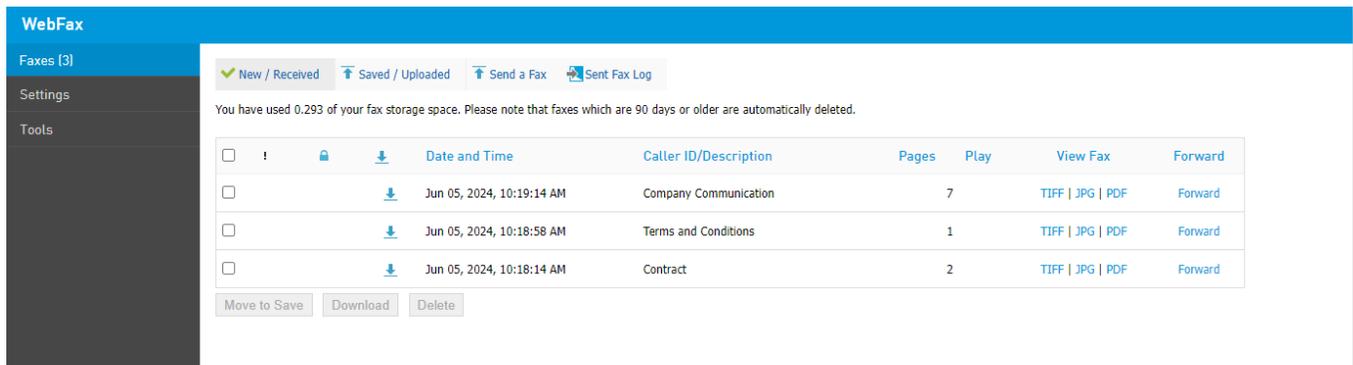

The online fax interface makes it easy to view and manage your faxes. With options of viewing your new and saved faxes, sending a fax, or viewing all your sent faxes, Webfax provides an easy-to-use fax management platform.

## By Web

Log into the online interface and begin by entering your WebFax number and PIN. From there you can view the list of received faxes for the last 90 days.

## By Email

Navigate to Settings > Notification to setup your preferred email you want PDFs of faxes to be sent to.
